

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

Land Acknowledgement

- The University of Alaska Fairbanks' (UAF) Troth Yeddha' campus in Fairbanks, Alaska is located on the unceded, traditional homelands of the Lower Tanana Dene.
- UAF's College of Fisheries and Ocean Sciences campus in Juneau, Alaska is located on the unceded territories of the Áak'w K'wáan.
- A map of Indigenous Peoples and Languages of Alaska can be found [here](#).

COVID-19 statement

Students should keep up-to-date on the university's policies, practices, and mandates related to COVID-19 by regularly checking [this website](#). Students are expected to adhere to the university's policies, practices, and mandates related to public health. While the formal COVID-19 response has ended, the advice that was true throughout the pandemic remains true now - please stay home if you are sick, cover your cough, and wash your hands to help keep our university communities healthy.

General Information

<i>Instructor:</i>	Kristen Gorman	<i>Office Location:</i>	Irving II, room 231
<i>Email:</i>	kbgorman@alaska.edu	<i>Office Hours:</i>	Monday and Wednesdays 12 – 2 pm, anytime by appointment.
<i>Telephone:</i>	907-474-5930	<i>*Course Type:</i>	Lecture: In-person, Online, Synchronous
<i>**Course Location:</i>	In-person: O'Neill, room 214 Online: https://alaska.zoom.us/join/8tHdOnU93AMowCtCBeU-OrGURI Canvas is our Learning Management System.	<i>Meeting Time:</i>	Mondays 2:15 – 4:15 pm Wednesdays 2:15 – 4:15 pm (January 17 – April 29, 2024) Final: 1 – 3 pm on Friday, May 3, 2024

Additional General Information

- As this course's instructor, I respectfully acknowledge Alaska's First Peoples and their long history of living in deep connection with their land and water, and the historical and ongoing legacy of colonialism. As a life-long student, I am committed to learning about injustice, and working to improve equity in my professional and personal life.

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

- This course meets in-person and online via Zoom during lecture hours (i.e., synchronously, see details above). **All students** (i.e., in-person or online attendees) **must register in advance** for the Zoom meeting to allow for the possibility of meeting entirely remotely due to unforeseen circumstances. After registering, you will receive a confirmation email containing information about joining the meeting, **you can save this information to your Google calendar to easily find the Zoom link each week.**
- Our in-class sessions will be recorded via Zoom to provide flexibility to those students who cannot attend. These recordings will be posted on Canvas (see weekly Modules), and therefore only available to enrolled students in this class. Despite classes being recorded, **students who will miss class should notify the instructor in advance** (see details below).
- If you need assistance navigating Zoom or Canvas please contact your instructor or [UAF's eCampus Student Support](#).

Prerequisites and Proficiencies

None, graduate standing. Students are expected to be familiar with the principles of basic biology, chemistry, physics, and statistics as all of these are fundamental to Fisheries Oceanography.

Course description

Oceanography of marine processes affecting vertebrates and invertebrates. Interactions between fisheries resources and physical and biological oceanography, and climatological and meteorological conditions that support sustainable management. Topics include recruitment, transport, mortality, feeding, distribution, abundance, El Nino/La Nina, regime shifts, and climate change. Global to local scales. Worldwide ecosystems and examples.

In-depth Course description

Fisheries Oceanography is study of fishes and shellfishes in the physical marine environment in which they live. It encompasses many aspects of fish from habitat structure to physiological effects of climate change. What makes Fisheries Oceanography different from Biological Oceanography is that Fisheries Oceanography also considers the fishes in the larger context of being a target for one or more fisheries. This course covers physical systems and factors that may affect fish distribution, abundance, survival, reproduction, and availability to the fisheries. We consider local, regional, and basin-wide scales. Examples are used from Alaska, the North Pacific, and the global ocean. Time scales affecting fishes range from seconds to millennia.

Course Readings

Required text: Dynamics of Marine Ecosystems: Biological-Physical Interactions in the Oceans, 3rd Edition (2006). K.H. Mann and J.R.N. Lazier. A copy of this textbook is available on reserve at the UAF Rasmuson Library. Additionally, this textbook is available electronically through the UAF Rasmuson Library (UA login credentials required):

[https://anch.ent.sirsi.net/client/en_US/uaf/search/detailnonmodal/ent:\\$002f\\$002fSD_ILS\\$002f0\\$002fSD_ILS:5152166/ada?qu=Dynamics+of+Marine+Ecosystems&d=ent%3A%2F%2FSD_ILS%2F0%2FSD_ILS%3A5152166%7EILS%7E3&h=8](https://anch.ent.sirsi.net/client/en_US/uaf/search/detailnonmodal/ent:$002f$002fSD_ILS$002f0$002fSD_ILS:5152166/ada?qu=Dynamics+of+Marine+Ecosystems&d=ent%3A%2F%2FSD_ILS%2F0%2FSD_ILS%3A5152166%7EILS%7E3&h=8)

Additional required readings: Refereed journal articles are assigned for each class and will be made available on [Canvas](#), see weekly Modules.

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

Supplemental Readings:

More elementary textbooks are available for additional reading in Biological Oceanography. There are several basic Oceanography texts and references that I can recommend or loan for those who are interested.

Technology Requirements

The course requires regular access to a computer and the internet to view and download any online materials on [Canvas](#), or electronic resources. At various points during the semester, you will need to download course material and post discussion assignments. For the purposes of this course, **please use your @alaska.edu email account only for correspondence with the instructor**, or the Canvas inbox feature to ensure that you do not miss any important information from the instructor.

Course Goals

- To learn and understand a variety of oceanographic processes affecting marine fishes.
- To develop as educated, critical thinkers with problem-solving skills, especially applied to fishes and the oceans.
- To practice oral and written communication skills.

Student Learning Outcomes

- Understand key oceanographic processes affecting fish and shellfish populations and communities.
- Understand large and small scale natural factors that affect fisheries.
- Understand potential effects of global warming and other anthropogenic threats on fisheries and the oceans.
- Ability to critically evaluate published literature.

Instructional Methods

The course is lecture- and discussion-based. Students are expected to attend class during regular meeting times, review reading materials as communicated by the instructor, and required to contribute to class discussions. Students who must attend remotely will be able to do so via Zoom during meeting times. Lecture slides will be made available after class and lectures will be recorded for students with excused absences or those attending asynchronously. Lecture slides and recordings will be made available on [Canvas](#), see weekly Modules.

Readings and Discussions: Students should understand, Fisheries Oceanography is a challenging 4 credit course that is reading- and writing-intensive. All students will be responsible for readings and contribute to discussions. Each week, one graduate student will be responsible for leading Wednesday discussions of selected literature (1-2 articles generally), and in particular, engaging undergraduate students to contribute to discussion. The engagement of undergraduates is a key component of graduate student involvement in the course, which may include pulling together slides for brief introductions to concepts addressed by the literature or further examples of key topics. Each graduate students will have one opportunity to lead discussion during the course, providing opportunities to evaluate literature, as well as will learn the valuable professional skill of leading discussions, including eliciting input from your colleagues.

Exams: The **two mid-term exams** are open-book, take-home exams. Students will be given 1 week to complete each exam. Note that because of the time required to prepare exams, students will be given release time from lectures, e.g., skipping two 2-hr lectures plus the 8 hrs that would be required outside of the classroom equals 12 hrs to prepare an exam. Exams will outline three possible exam questions, with students selecting two questions

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

that are of interest to focus on in a short essay. Exams are comprehensive style and require inclusion of literature to address a problem. Students are expected to write an organized, well thought out, comprehensive answer and to include relevant literature beyond what was used in class to support their arguments (think written comprehensive exam). Students must work to develop their own writing abilities and style. Graduate students are welcome to use Artificial Intelligence (AI) resources to help research their ideas, however, on mid-term exams (and elsewhere) students should use their own writing to craft their essays. If any portion of the essay (or any student work) is derived from AI resources, this must be cited appropriately (see details on exam). Exams will be vetted through AI detection software, any use of AI that not properly cited will be subject to Academic Honesty violations. Exams will be graded on knowledge of the material, but also on analytical ability to put components of the material together to find a comprehensive solution to a larger problem. Because one of the objectives is for the students to learn the skill of professional writing, all exams also will be corrected (in MS Word Track Changes) for grammar, punctuation, sentence structure, topic organization, etc. Students are reminded that the ability to write succinctly is crucial. Thus, exams will provide guidelines on approximate length (~3-5 pages per question), however students are expected to decide what critical information to include in their essays. This approach is analogous to what will be required of them when writing reports, e.g., for agencies, or peer-reviewed publications. Figures and Tables are encouraged, and specifics on Literature Cited formats will be provided on the exam. A **Final Exam** will be given in person and will focus on demonstrating your knowledge of fisheries oceanography concepts through short answers, true/false question, and definition matching.

Presentations: Graduate students will be required to prepare and present a 10-minute PowerPoint presentation of the key ideas of their exams for presentation to the class and answer questions from class members. The objective is for students to learn from each other, i.e., students usually have different approaches to solving a problem and a variety of ideas that are of value. All students, graduate and undergraduate, will complete a form evaluating the presentations. These forms are based on those used to judge students at the Alaska Marine Science Symposium.

Assignments: Multiple readings are assigned for each class. Expect approximately 2 hrs of reading for each hour of in-class time. See [Canvas](#) weekly Modules for readings and any specific details regarding associated discussion topics/approaches.

Explanation of Student Effort

Students are expected to attend 4 hours of lecture/discussion each week, and spend another 2 hours per lecture hour each week reading, or preparing assignments and presentations. In general, students should expect to spend about 12 hours each week on this course.

Tentative Course Calendar

Week	Date	Topic	Readings	Discussion	Delivery
1	Wed, Jan 17	<u>INTRODUCTION</u> : Fisheries Oceanography Paradigms	Mann & Lazier Chap 1, additional readings TBA.		Synchronous
2	Mon, Jan 22	<u>SMALL SCALE PROCESSES</u> : Boundary Layers	Mann & Lazier Chap 2, additional readings TBA.		Synchronous
2	Wed, Jan 24	Primary Productivity – tropics & sub-tropics	Mann & Lazier Chap 3 (pp. 69-87), additional readings TBA.	30 mins - Gorman	Synchronous
2	Fri, Jan 26	<i>Last day to add class or drop with refund</i>	-----		
3	Mon, Jan 29	No Class–AMSS	-----		
3	Wed, Jan 31	Primary Productivity – temperate, polar, & secondary production	Mann & Lazier Chap 3 (pp. 87-117), additional readings TBA.		Asynchronous
4	Mon, Feb 5	Primary Productivity Review, Coriolis & Estuaries	Mann & Lazier Chap 4 (pp. 119-136), additional readings TBA.		Synchronous
4	Wed, Feb 7	Tidal Mixing & Plumes	Mann & Lazier Chap 4 (pp. 136-161), additional readings TBA.	30 mins – Student 1	Synchronous
5	Mon, Feb 12	<u>INTERMEDIATE SCALE PROCESSES</u> : Upwelling Intro – eastern boundary upwelling (EBUE) and non-EBUE	Mann & Lazier Chap 5 (sec 5.1-5.2, pp. 166-178, sec 5.8, pp. 210-215), additional readings TBA.		Synchronous
5	Wed, Feb 14	Upwelling – California Current	Mann & Lazier Chap 5 (sec 5.5, pp. 194-204), additional readings TBA.	30 mins – Student 2	Synchronous
6	Mon, Feb 19	<i>Mid-term grades due</i>	-----		
6	Mon, Feb 19	Upwelling – Canary Current & Benguela	Mann & Lazier Chap 5 (sec 5.3, pp. 178-187, secs 5.6-5.7, pp. 204-210), additional readings TBA.		Synchronous
6	Wed, Feb 21	Upwelling – Humboldt Current & EBUE Comparisons	Mann & Lazier Chap 5 (sec 5.4, pp. 187-194), additional readings TBA.	30 mins – Student 3	Synchronous

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

7	Mon, Feb 26	Fronts	Mann & Lazier Chap 6 (pp. 216-253), additional readings TBA.		Asynchronous – Gorman off campus
7	Wed, Feb 28	Tides & Internal Waves	Mann & Lazier Chap 7 (pp. 254-284), additional readings TBA.	Online – All Students	Asynchronous – Gorman off campus
7	Fri, Mar 1	EXAM 1 Distributed, by 5 pm	-----		
8	Mon, Mar 4	No Class–Exam 1 Preparation	-----		
8	Wed, Mar 6	No Class–Exam 1 Preparation	-----		
8	Fri, Mar 8	EXAM 1 Due, by 5 pm			
9	Mon, Mar 11	No Class–Spring Break	-----		
9	Wed, Mar 13	No Class–Spring Break	-----		
10	Mon, Mar 18	Exam 1 Discussion. LARGE SCALE PROCESSES: Circulation & Ocean Basins	Mann & Lazier Chap 8 (pp. 288-315), additional readings TBA.		Synchronous
10	Wed, Mar 20	Gyres, Rings, & Eddies	Mann & Lazier Chap 8 (pp. 315-336), additional readings TBA.	30 mins – Student 4	Synchronous
11	Mon, Mar 25	ENSO	Mann & Lazier Chap 9 (secs 9.1, 9.2.1, 9.2.2a, 9.3.1, pp. 337-345, 354-355), additional readings TBA.		Synchronous
11	Wed, Mar 27	North Pacific Ocean	Mann & Lazier Chap 9 (secs 9.2.2b, 9.3, 9.4, pp. 345-347, 354-362), additional readings TBA.	30 mins – Student 5	Synchronous
11	Fri, Mar 29	Deadline for student- and faculty-initiated withdrawals (W on transcript)	-----		
12	Mon, Apr 1	North Atlantic Ocean	Mann & Lazier Chap 9 (secs 9.2.2c, 9.5, 9.6, pp. 347-349, 362-381), additional readings TBA.		Synchronous
12	Wed, Apr 3	Southern Ocean	Mann & Lazier Chap 9 (secs 9.7, pp. 381-382), additional readings TBA.	30 mins – Student 6	Synchronous

13	Mon, Apr 8	Regime Shifts - physical	Mann & Lazier Chap 9 (secs 9.2.2d, 9.8, 9.9, pp. 349-353, 382-389), additional readings TBA.		Synchronous
13	Wed, Apr 10	Regime Shifts - biological	Peer-reviewed Lit TBA.	30 mins – Student 7	Synchronous
14	Mon, Apr 15	Climate Change – physical, biological	Mann & Lazier Chap 10 (secs 10.1-10.3, 10.5-10.6 pp. 390-410, 415-422), additional readings TBA.		Synchronous
14	Wed, Apr 17	Climate Change – paleo Arctic Warming & Fish	Mann & Lazier Chap 10 (secs 10.4 pp. 410-415), additional readings TBA. Peer-reviewed Lit TBA.	30 mins - Gorman	Synchronous
14	Fri, Apr 19	<i>EXAM 2 Distributed, by 5 pm</i>	-----		
15	Mon, Apr 22	<i>No Class–Exam 2 Preparation</i>	-----		
15	Wed, Apr 24	<i>No Class–Exam 2 Preparation</i>	-----		
15	Fri, Apr 26	EXAM 2 Due, by 5 pm			
16	Mon, Apr 29	Exam 2 Discussion Semester Review			Synchronous
16	Fri, May 3	FINAL EXAM	1:00 – 3:00 pm		

Evaluation

- The course is primarily lecture- and discussion-focused during meeting times. Thus, your attendance and participation in class meetings is required and will be calculated as part of your grade. Participation is key to student learning as it fosters communication and peer to peer discussion. For example, we encourage at least one comment or question per class period by each student. Students will earn up to 50 points for contributing to class discussions over the entire semester (3 points per 23 classes and handing in 2 exams). A total of 75 points towards your final grade.
- Each student will be responsible for leading one Wednesday topic discussion. A total of 25 points towards your final grade.
- There will be two take home exams, each worth 150 points (75 points each question). A total of 300 points towards your final grade.
- Two 10-minute PowerPoint presentations are required of key points of take-home exams, each worth 25 points. A total of 50 points towards your final grade.

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

- There will be an ~1 hour closed book final exam that will focus on major fisheries oceanography concepts through short answer, multiple choice/matching, and true/false questions. A total of 50 points towards your final grade.

Grading

	Possible points	% of total grade
Participation	75	15%
Leading Wednesday Discussion	25	5%
Midterm Exam #1	150	30%
Midterm Exam #2	150	30%
Exam Presentations	50	10%
Final Exam	50	10%
Total	500	100%

Course grades will be assigned according to the following scale:

A = 90-100 %

B = 80-89 %

C = 70-79 %

D = 69-60 %

F = less than 60%

Course Policies

1.) Expectations On Progress In Coursework

- The objective is to enhance your learning by interaction with other students who have different ideas and contributions that I do. Thus, you have an obligation to not only learn from them, but to participate and help them learn from you.
- All assignments submitted are to be entirely your own work, unless you receive specific instructions to the contrary. I expect high ethical standards and cheating, plagiarism, or other forms of academic dishonesty are unacceptable. Honesty is crucial to establishing oneself as a credible scientist and professional. Adherence to the [UAF Student Code of Conduct](#) is mandatory.
- Graduate students are welcome to use Artificial Intelligence (AI) resources to help research their ideas, however, students should use their own writing and communicating of their own work. If any portion of a student's work is derived from AI resources, these must be cited appropriately. Student written work will be vetted through AI detection software, any use of AI that not properly cited will be subject to Academic Honesty violations.
- Please make sure you use your current @alaska.edu email address for all course correspondence. Check your e-mail messages regularly. Class information and changes to the syllabus will be distributed through Canvas to your email. Please note that the course schedule is "tentative", and the "actual" course schedule will be a living document that evolves over the semester (see Canvas).
- This course will require students to have access to the internet, a personal computer, and familiarity with basic computer software programs such as Word, PowerPoint, and Excel.

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

2.) Attendance, Tardiness, Class Participation, Make-up Exams

- Attendance is required for the course, either in-person or via Zoom, during the course meeting times. Students can miss one class unexcused, but reviewing the material covered during the missed class is your responsibility.
- Students are expected to participate in all aspects of the course including during lectures by asking questions, and during peer-to-peer discussion session. Please come to class ready to engage with the course material, your fellow classmates, and the instructor. Students will be graded on their participation in discussion for a total of 15% of their final grade.
- Regular attendance, consistent participation, and timely submission of assignments are important for building professional skills and abilities, this course seeks to develop and reinforce such etiquette.
- If you have a schedule conflict with class attendance, e.g., attending a meeting, going to sea, please inform me in advance. You are responsible for any material that is covered in your absence, i.e., readings and lectures. For full participation credit during absences, please provide 1-2 questions for the lecture as if you had attended class. Powerpoint slides and the lecture recording will be available after class and posted on Canvas in weekly modules.
- As there are only two mid-term exams, in most cases they will be given at times when no student has a schedule conflict. All exams are take-home; you will have 1 week to complete the exam. Inform the instructor of any schedule conflicts to arrange for a makeup exam.

3.) Plagiarism & Academic Integrity

Academic dishonesty applies to examinations, assignments, laboratory reports, fieldwork, practicums, creative projects, or other academic activities. Examples include, but are not limited to:

- a) presenting as their own the ideas or works of others without proper citation of sources;
- b) utilizing devices not authorized by the faculty member;
- c) using sources (including but not limited to text, images, computer code, and audio/video files) not authorized by the faculty member;
- d) providing assistance without the faculty member's permission to another student, or receiving assistance not authorized by the faculty member from anyone (with or without their knowledge);
- e) submitting work done for academic credit in previous classes, without the knowledge and advance permission of the current faculty member;
- f) acting as a substitute or utilizing a substitute;
- g) deceiving faculty members or other representatives of the university to affect a grade or to gain admission to a program or course;
- h) fabricating or misrepresenting data;
- i) possessing, buying, selling, obtaining, or using a copy of any material intended to be used as an instrument of assessment in advance of its administration;
- j) altering grade records of their own or another student's work;
- k) offering a monetary payment or other remuneration in exchange for a grade; or
- l) violating the ethical guidelines or professional standards of a given program.

For more, see [Students Rights and Responsibilities](#).

4.) Classroom Etiquette and Student Behavior Guidelines.

- As with all members of the UAF community, the university requires all in-person and online students to conduct themselves honestly and responsibly and to respect the rights of others. Students may not

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

engage in behavior that disrupts the learning environment, violates the rights of others, or otherwise violates the student code of conduct, university rules, regulations, or procedures. More information about the UAF Student Code of Conduct and Student Rights and Responsibilities can be found [here](#).

- High ethical standards are expected of all students in this course. Violations of the UAF Student Code of Conduct will result in an immediate "F" grade. Additionally, violations of the Student Code of Conduct may result in disciplinary action initiated by UAF.

5.) Extended Absence Policy

Extended absences are defined as missed classes or course work by students beyond what is permissible by the instructor's written course policies. Students may need to miss class and/or course work for a variety of reasons, including, but not limited to:

- bereavement
- personal illness or injury
- serious illness of a friend, family member or loved one
- military obligations
- jury service
- other emergency or obligatory situations

For more information, go to the student handbook or the Center for Students Rights and Responsibilities.

6.) UAF Incomplete Grade Policy:

Your instructor follows the University of Alaska Fairbanks Incomplete Grade Policy:

"The letter "I" (Incomplete) is a temporary grade used to indicate that the student has satisfactorily completed (C- or better) the majority of work in a course but for personal reasons beyond the student's control, such as sickness, has not been able to complete the course during the regular semester. Negligence or indifference are not acceptable reasons for an "I" grade."

For more information, see [the UAF regulations regarding grades](#).

Student Protections Statement

UAF embraces and grows a culture of respect, diversity, inclusion, and caring. Students at this university are protected against sexual harassment and discrimination (Title IX). Faculty members are designated as responsible employees which means they are required to report sexual misconduct. Graduate teaching assistants do not share the same reporting obligations. For more information on your rights as a student and the resources available to you to resolve problems, please go to the following site: <https://catalog.uaf.edu/academics-regulations/students-rights-responsibilities/>.

Disabilities Services Statement

I will work with the Office of Disability Services to provide reasonable accommodation to students with disabilities. The Office of Disability Services (Eielson Building room 104, 907-474-5655) implements the Americans with Disabilities Act (ADA), and ensures that UAF students have equal access to the campus and course materials.

ASUAF Advocacy Statement

The Associated Students of the University of Alaska Fairbanks, the student government of UAF, offers advocacy services to students who feel they are facing issues with staff, faculty, and/or other students specifically if these issues are hindering the ability of the student to succeed in their academics or go about their lives at the

Fisheries Oceanography, FISH/OCN F643

4 Credits
Spring, 2024

university. Students who wish to utilize these services can contact the Student Advocacy Director by visiting the ASUAF office or emailing asuaf.office@alaska.edu.

Non-Discrimination Statement

The University of Alaska is an affirmative action/equal opportunity employer and educational institution. The University of Alaska does not discriminate on the basis of race, religion, color, national origin, citizenship, age, sex, physical or mental disability, status as a protected veteran, marital status, changes in marital status, pregnancy, childbirth or related medical conditions, parenthood, sexual orientation, gender identity, political affiliation or belief, genetic information, or other legally protected status. The University's commitment to nondiscrimination, including against sex discrimination, applies to students, employees, and applicants for admission and employment. Contact information, applicable laws, and complaint procedures are included on UA's statement of nondiscrimination available at www.alaska.edu/nondiscrimination. For more information, contact:

Title IX

University of Alaska Board of Regents have clearly stated in BOR Policy that discrimination, harassment and violence will not be tolerated on any campus of the University of Alaska. If you believe you are experiencing discrimination or any form of harassment including sexual harassment/misconduct/assault, you are encouraged to report that behavior. If you report to a faculty member or any university employee, they must notify the UAF Title IX Coordinator about the basic facts of the incident.

Your choices for reporting include:

1. You may access confidential counseling by contacting the UAF Health & Counseling Center at 907-474-7043;
2. You may access support and file a Title IX report by contacting the UAF Title IX Coordinator at 907-474-6600;
3. You may file a criminal complaint by contacting the University Police Department at 907-474-7721. For more information please visit the [UAF Department of Equity and Compliance](#) webpage.

Any UAF employee or volunteer who reasonably suspects or observes minor abuse or maltreatment is required to report the incident. Reporting procedures are available on the UAF Protection of Minors. Violation of this policy by employees shall be reported as well.

Emergency Notification Plan

Students will receive emergency notifications via phone or email. Please check your uaonline account to confirm your emergency notification settings. for more information, please refer to the student handbook. In cases where you do not have access to your devices, as your instructor, I will take responsibility to relay any emergency notifications.
